RADICI

# | THANK YOU

FOR PURCHASING ONE OF OUR PREMIUM CARPET. COMMON SENSE WILL TAKE YOU A LONG WAY WHEN IT COMES TO KEEPING YOUR CARPET GORGEOUS AND CLEAN. FOLLOW THESE SIMPLE TIPS:

## | ORDINARY CARE

### USE DOORMATS AT ENTRANCES

A simple doormat prevents dirt from getting transferred all over the place and into the fibers of your carpet. Make sure to clean these mats often, so that they do not become a source of dust and dirt themselves.

### VACUUM REGULARLY

Remove dust and dirt with a powerful vacuum cleaner. This is a good habit that improves the air quality in your space and ensures the durability by removing the dirt. At the same time, the brushing from the vacuum through the top of the carpet fibers, forces the dirt to lose its grip.

### STAIN TREATMENT

While vacuuming, look for stains and treat them with the proper detergent. Always act quickly for an effective stain removal. Never rub the carpet, this could damage the fibers. Never soak a carpet with water that will seep through the backing.

## | EXTRAORDINARY CARE

### IN-DEPTH CLEANING

Even if you vacuum your carpet regularly and treat stains accordingly, an in-depth cleaning is necessary every 4/8 months, based on the traffic. For a thorough cleaning you can use wet/dry shampoo or an injection-extraction method. Make sure that all detergents are properly removed from the carpet before walking on it again.

#### A. USE THE ROTATING MACHINE

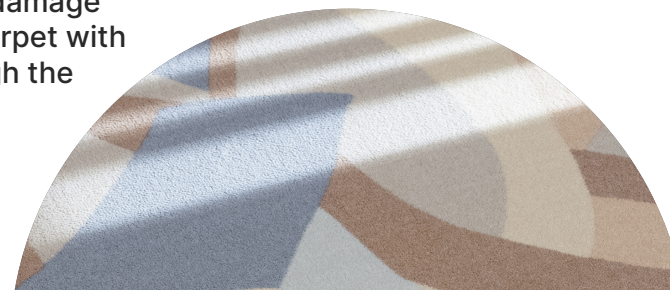

Use a slow rotating machine and go across the areas you have sprayed the detergent. Make sure that you change the pad often in order to absorb as much dirt and detergent as possible.

#### B. USE THE EXTRACTION MACHINE

Start rinsing the carpet by using a spray extraction machine. This step will remove cleaning fluids and dirt from the carpet.

### DRYING

The dry times in a well ventilated room is around 6-8 hours. For faster drying times, you can use a fan that circulates the air across the surface of the carpet and draws out the moisture.

# HOW TO:

## INTERVENE ON DIFFERENT STAIN

RADICI

### TREAT STAIN AS THEY HAPPEN

IT'S BEST TO TAKE CARE OF SPILLS AS QUICKLY AS POSSIBLE. DON'T LET LIQUIDS OR DIRT DRY UP AND SET IN. THE QUICKER YOU ACT, THE EASIER THE STAIN CAN BE REMOVED.

ALCOHOLIC DRINK	1	2
